

DANUBE4all – Restoration of the Danube River Basin Waters for Ecosystems and People from Mountains to Coast

Introduction to DANUBE4all

Helmut Habersack

Funded by
the European Union

Objective

the **vision of DANUBE4all** is to jointly work on **sustainable and interdisciplinary restoration pathways for the DRB**. This will build on an underlying **science-to-people approach** (i.e., societal co-creation), which actively integrates inhabitants' interests and empowers Danube stakeholders, from local communities, SMEs, investors, policy makers and the business sector

Main output

Danube Basin Restoration Action Plan

Project start date: 1 January 2023

Project end date: 31 December 2027

Project duration: 60 months

Consortium: 48 Partners and Associated Partners

Budget: ca. 8,42 mio € (Total eligible costs)
ca. 7,97 mio € (Maximum grant amount)

DANUBE4all will develop a fundamental and fully public Restoration Action Plan for the Danube basin lighthouse of the Mission “Restore our ocean and waters by 2030”. This Action Plan will:

- be informed by testing in Demonstration Sites and knowledge exchange in Danube Synergy Sites (cooperation sites with other e.g. LIFE projects),
- give a vision for upscaling restoration to the whole Danube Basin,
- inspire replication of restoration solutions in Associated Regions.

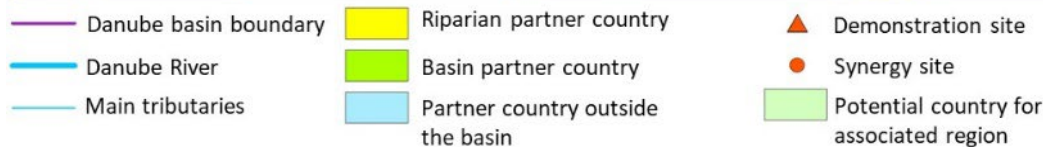

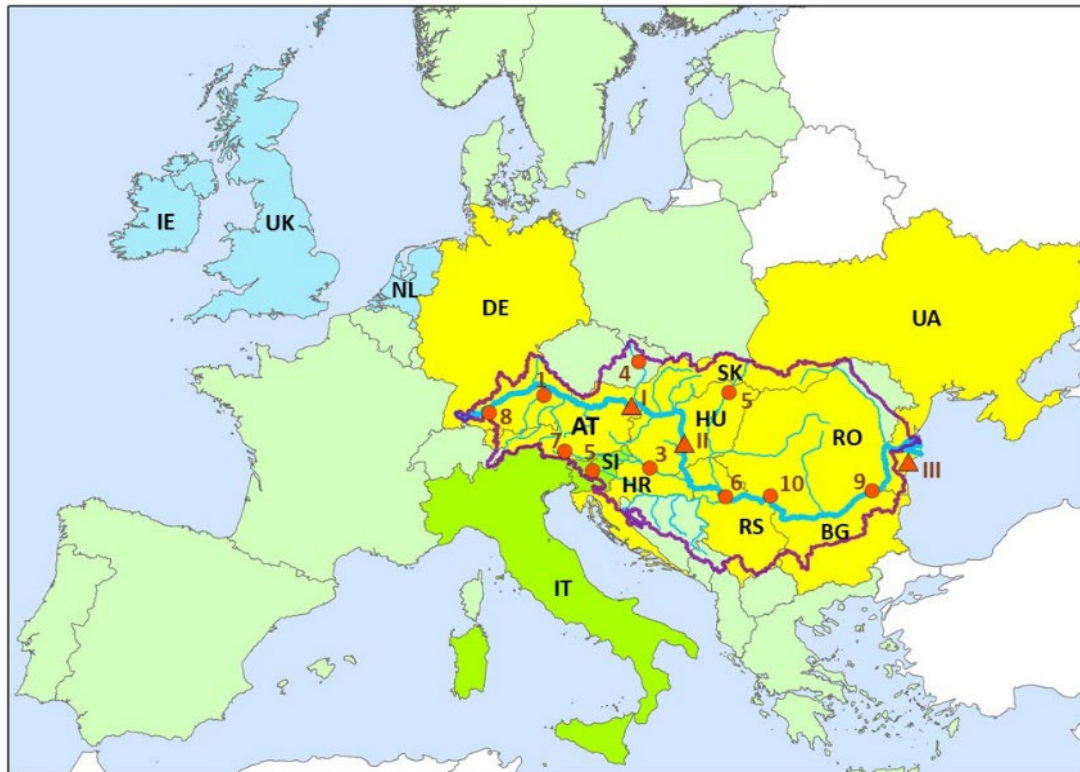

This Danube Basin Restoration Action Plan will be

- scientifically based,
- practically oriented,
- attracting and involving people, businesses, stakeholders, practitioners and decision makers, and thus

form an important basis for the next update of the Danube and national River Basin Management Plans (DRBMP), the Danube Flood Risk Management Plans and the future National Restoration Plans.

Demonstration and Synergy Sites

Demonstration & Synergy Sites

Demonstration Sites

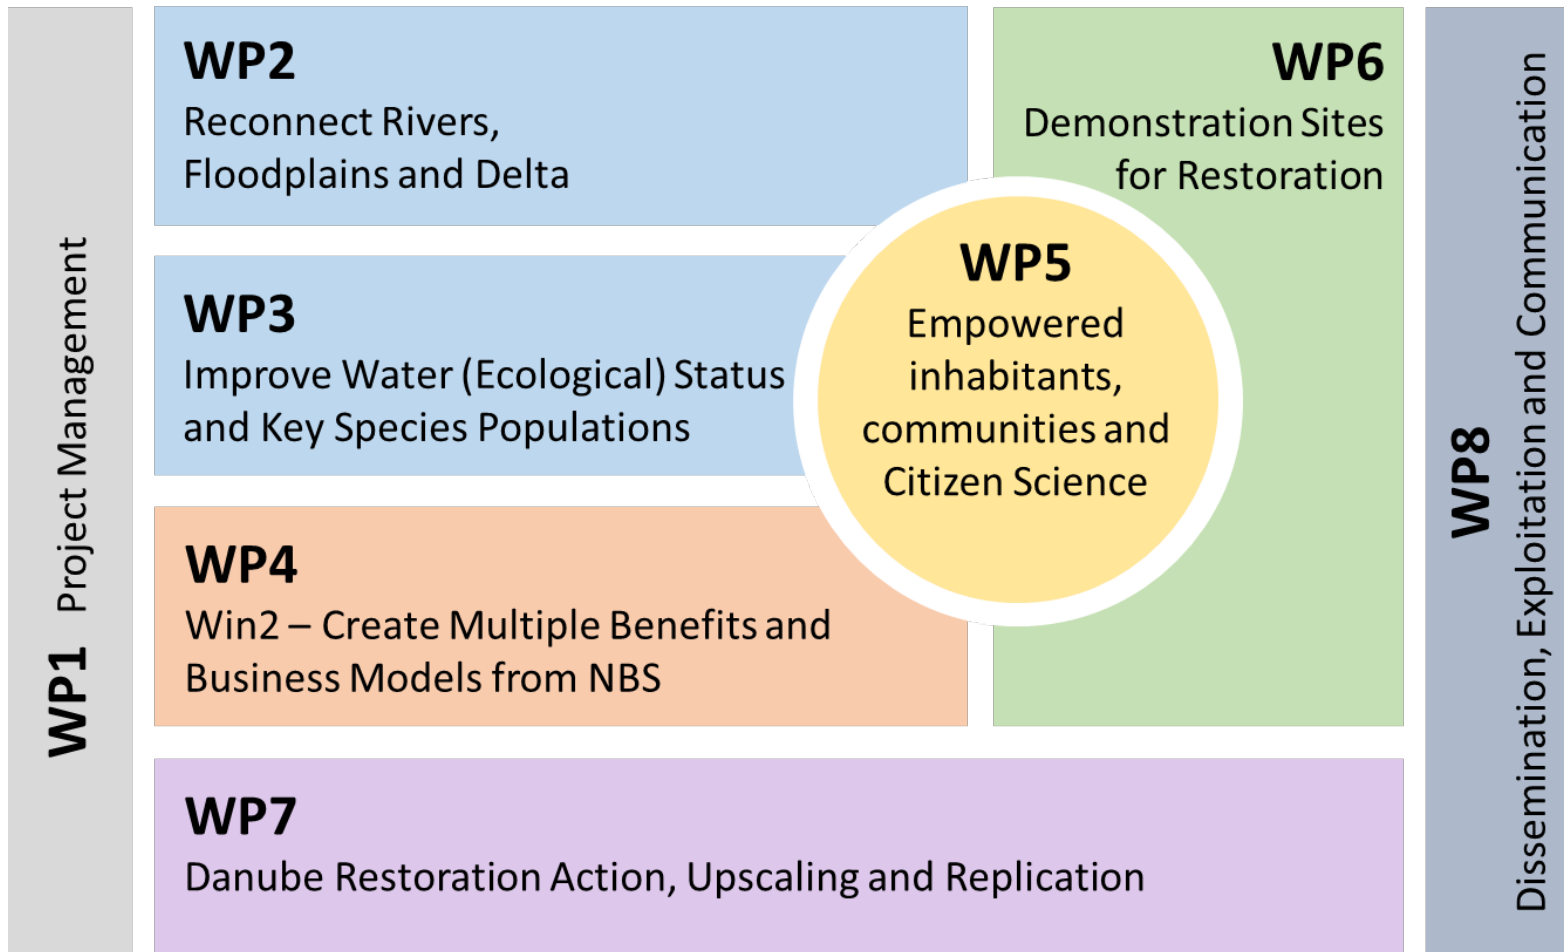

- I. Upper Danube, Austria
- II. Middle Danube, Hungary
- III. Danube Delta Biosphere Reserve

Synergy Sites

1. EU Life river restoration project on the Isar
2. Kamniška Bistrica River
3. WiseDrava LIFE project & nature conservation along River Drava
4. Morava river
5. Bereg - Upper Tisza river
6. Semi-wild Danube floodplain around Belgrade
7. Obergottesfeld, Drava River
8. Biberach, Rißbach
9. Srebrna Lake
10. Iron Gate dam
